

Giridhar Pai

Cybersecurity Analyst / Blue Team

Dakshina Kannada, Karnataka, India

Email: www.giridharpai@gmail.com [linkedin.com/in/giridharpai227](https://www.linkedin.com/in/giridharpai227) github.com/Giri227

Summary

Cybersecurity student with a strong blue-team profile focused on SOC operations, threat detection, Splunk SIEM, AWS security, and proactive threat hunting. Pursuing a BCA in Cyber Security, Ethical Hacking, and Digital Forensics with IBM collaboration at Yenepoya University, with 5+ security projects, 23+ certifications, 3+ hackathon wins, and a Top 1% ranking on TryHackMe. Skilled in Splunk, AWS Security, SIEM-style log analysis, digital forensics, and SOC-oriented incident response.

Education

Yenepoya University

Jul 2023 – Jul 2026

BCA, Cyber Security, Ethical Hacking, Digital Forensics with IBM Collaboration

Grade: 9.15

- Specialised training in cybersecurity, ethical hacking, and digital forensics in collaboration with IBM, with emphasis on SOC-style monitoring, incident response, and Splunk SIEM.
- OWASP Yenepoya Chapter member; participated in “Hackers Unveiled” cybersecurity challenge and IBM Cybersecurity Specialization labs.

SNM Polytechnic, Moodbidri

Aug 2019 – May 2022

Diploma in Computer Science and Engineering

Grade: Distinction with First Class

- Built strong foundations in networking, system administration, and software engineering, supporting incident-response and SOC workflows.

Experience

IBM — Project-Based Intern, Cybersecurity

May 2025 – Jun 2025

Tejas Raksha – Zero-Day Scanner for Agricultural Portals

- Designed and extended a zero-day-vulnerability scanner for web portals used by the agricultural sector, focusing on early-warning detection and SOC-friendly alerting.
- Automated reconnaissance and attack-surface discovery, then prioritised findings for SOC analysts and security admins.
- Aligned scanning behaviour with performance-critical, production-like portal environments.

Deloitte Australia — Cyber Job Simulation Intern

2025

- Completed a cyber job simulation internship with hands-on exposure to enterprise cybersecurity operations, SOC-style incident response, and log analysis.

AgileTEC, Mangaluru — In-Plant Training, Android Development

Apr 2022

- 3-week hands-on training in Android application development, including integration with backend services and security-aware logging practices.

Projects

DefendX – Real-Time Threat Detection and Monitoring System

IBM ICE DAY 2025

- SOC-style threat-detection system achieving 2nd Place in a CTF competition and 2nd Runner-Up in a 24-hour hackathon.
- Implemented real-time log-based and network-based anomaly detection, with prioritised alerting suitable for SOC-shift workflows.
- Emphasised proactive monitoring, triage-friendly output, and incident-response readiness.

Tejas Raksha – Zero-Day Scanner for Agricultural Portals *IBM / Project Based Internship March – April 2026*

- Blue-team-focused scanner for agricultural-sector web portals, aiming to detect unknown and emerging vulnerabilities.
- Automated discovery of misconfigurations and attack surfaces, then formatted alerts and logs for SOC-style analysis.
- Reduced analyst noise by prioritising high-risk components and exploits.

AI-Powered DeepFake Detection System

CIDECODE Hackathon 8 – 9 March 2025

- Consolation-prize-winning system achieving 99% accuracy using heatmap analysis and metadata extraction.
- Designed analyst-oriented UI and reporting for SOC-adjacent disinformation, media-integrity, and content-moderation workflows.

Future City – AI-Powered Urban Planning Application

CODE SPRINT Hackathon 10 – 11 February 2025

- Finalist (Top 7 out of 65 teams); AI-driven urban-planning application with role-based access and security-aware logging.
- Applied logging and correlation patterns relevant to SOC-style incident-response and auditing.

Doctors Appointment Booking System

KAUSHALYAM 2022

- Award-winning web application (BEST PROJECT AWARD) with authentication, role-based access, and secure-state handling.
- Practised web-application security principles relevant to SOC-style log analysis and incident review.

Licenses & Certifications

Cloud & Security Certifications

- **AWS Certified Security – Specialty (SCS-C02)** – Whizlabs / Coursera, Issued Jun 2025. Validated expertise in cloud security, threat detection, and secure architecture design.
- **Managing Security and Administration in SAP Analytics Cloud** – SAP Learning, Issued Jan 2026. Intermediate-level course on user/role management, content security, and custom authentication.
- **Google Cybersecurity Professional Certificate** – Google via Coursera, Issued Feb 2025. Comprehensive training in security fundamentals, network security, and SOC-style incident response.
- **CompTIA Network+** – Coursera, Issued Jun 2025. Validates networking and data-security concepts.
- **CompTIA A+ Cyber** – Coursera, Issued Jun 2025. Covers cybersecurity tools and basic security control concepts.

API, Blue-Team, and Governance

- **CAPIE – Certified API Hacking Expert** – The XSS Rat, Issued Feb 2026. Validates technical proficiency in identifying API vulnerabilities and implementing secure API architectures.
- **Certified SME Cyber Security Officer (CSCSO)** – EU Cyber Academy / ICTTF, Issued Feb 2026. Validates expertise in cybersecurity frameworks, risk assessment, and governance for SMEs.
- **Certified Cybersecurity Educator Professional (CCEP)** – Red Team Leaders, Issued Dec 2025. Validates skills in cybersecurity education, consistency, and threat-hunting techniques.
- **Certified Red Team Operations Management (CRTOM)** – Red Team Leaders, Issued Dec 2025. Validates understanding of red-team operations and defensive-alignment practices.

Splunk, Deloitte, and Analytics

- **Splunk: The Complete Course from Zero to Hero 2022** – Issued Nov 2022. Covers Splunk Core, Splunk Enterprise, and admin-level SIEM operations.
- **Deloitte Australia – Cyber Job Simulation Internship** – Issued Jun 2025. Practical exposure to enterprise cybersecurity operations and SOC-style workflows.
- **Deloitte Australia – Technology Job Simulation** – Issued Dec 2025. Focus on agile development, consistency, and secure software practices.
- **Deloitte Australia – Data Analytics Job Simulation** – Issued Dec 2025. Practical analytics and consistency skills in a security-adjacent context.

Technical Skills

- **Security Domains:** Threat detection, proactive threat hunting, SOC operations, SIEM/SOAR, IDS/IPS, incident response, risk management, digital forensics, web-application security, cloud security, API security, SME security governance.
- **Tools & Platforms:** Splunk (SIEM), AWS Security services, SAP Analytics Cloud, Linux, SQL, HTML/CSS, Python for automation, Android development tooling.
- **Programming:** Python, Java, C++, C, JavaScript.

Achievements

- 2nd Place in IBM ICE DAY 2025 CTF and 2nd Runner-Up in 24-hour hackathon (DefendX).
- Consolation Prize Winner, CIDECODE Hackathon (DeepFake Detection System).
- Finalist, CODE SPRINT Hackathon – Top 7 / 65 teams.
- BEST PROJECT AWARD, KAUSHALYAM 2022 (Doctors Appointment Booking System).
- Active member of OWASP Yenepoya Chapter since Apr 2024.
- TryHackMe – Top 1% ranking globally.
