

Giridhar Pai

Cybersecurity Analyst — SOC Operations — Blue Team
giridharpai@gmail.com — linkedin.com/in/giridharpai227 — github.com/Giri227

PROFESSIONAL SUMMARY

Dedicated Cybersecurity student and Blue Team practitioner with a proven track record in SOC operations, SIEM log analysis, and automated threat detection. Leveraging a strong foundation in Ethical Hacking and Digital Forensics, I have successfully engineered production-ready security tools and triaged complex threats. Certified in AWS Security, API Hacking, and Network Security, with a Top 1% ranking on TryHackMe, I bring a proactive, analytical approach to infrastructure defense and incident response.

PROFESSIONAL EXPERIENCE

IBM

Mangalore, India

Project-Based Intern, Cybersecurity

March 2026 – April 2026

- Spearheaded the development of "Tejas Raksha," an automated zero-day vulnerability scanner for the agricultural sector, protecting critical infrastructure handling sensitive subsidies and farmer PII.
- Architected a distributed microservices ecosystem utilizing Docker Compose, ensuring high-availability deployment across 6 independent services, including API gateways and Redis-based message brokers.
- Implemented asynchronous crawling pipelines (FastAPI/Celery) capable of scanning targets at 100+ pages per minute while maintaining a low resource footprint.
- Authored 12+ proprietary security plugins for OWASP Top 10 vulnerability detection, achieving a 94% confidence rate through multi-stage clustering and false-positive reduction.
- Integrated real-time threat monitoring using WebSockets and automated executive PDF reporting via ReportLab, reducing audit generation time to 3.2 seconds.

Deloitte Australia

Remote

Cyber Job Simulation Intern

2025

- Conducted hands-on enterprise security simulations, focusing on log analysis (Splunk) and incident triage within a SOC environment.
- Analyzed security vulnerabilities and drafted remediation strategies consistent with enterprise governance and risk assessment frameworks.

SELECTED PROJECTS

DefendX: Real-Time Threat Detection System

2025

- Developed a SOC-oriented monitoring system for real-time anomaly detection, securing 2nd Place at IBM ICE DAY 2025 CTF.
- Implemented network-based traffic correlation, enhancing incident response readiness for multi-stage cyber threats.

AI-Powered DeepFake Detection System

2025

- Designed an award-winning detection framework (Consolation Prize, CIDECODE) utilizing metadata forensic analysis and heatmaps, achieving 99% accuracy in content integrity validation.

CERTIFICATIONS & GOVERNANCE

- **Cloud & Security:** AWS Certified Security Specialty (SCS-C02), Google Cybersecurity Professional Certificate.
- **Specialized Expertise:** Certified API Hacking Expert (CAPIE), Certified SME Cyber Security Officer (CSCSO).
- **Network & Admin:** CompTIA Network+, CompTIA A+, Managing SAP Analytics Cloud.

TECHNICAL COMPETENCIES

- **Security Domains:** Threat Hunting, SOC Operations, SIEM/SOAR, Incident Response, Digital Forensics, Cloud Security, API Governance.
- **Technical Toolkit:** Splunk (SIEM), AWS Security Suite, Docker, Linux Administration, PostgreSQL, Redis, FastAPI, Git, CI/CD Pipeline Integration.
- **Programming:** Python (Advanced Scripting/Automation), JavaScript (React), C/C++, Java.
