

# Giridhar Pai

Cybersecurity Analyst | Information Security Analyst | Security Operations

Bantwal, Karnataka, India | +91 96201 36007 | www.giridharpai@gmail.com | LinkedIn | GitHub | Portfolio

## Professional Summary

Cybersecurity student with hands-on SOC monitoring, vulnerability assessment, and digital forensics experience. Top 1% on TryHackMe and IBM CTF finalist — proven ability to perform under pressure. Skilled in Splunk SIEM, AWS security, incident response workflows, and compliance documentation. Brings strong process discipline and analytical rigor to security operations, vulnerability management, and risk analysis.

## What Makes Me Different

I bring a unique mix of **technical depth** and **practical discipline**: I don't just learn cybersecurity concepts, I test them in real CTF competitions, build working security tools, and document findings with SOC-level accuracy. My TryHackMe Top 1% ranking and IBM CTF 2nd Place win show I can perform under pressure. I combine this with strong documentation habits and process adherence — the kind of reliability that security teams need but rarely find in students.

## Education

### Yenepoya University (Mangalore)

Jul 2023 – Jul 2026

BCA in Cyber Security, Ethical Hacking, and Digital Forensics (IBM Industry Collaboration)

### S N Moodbidri Polytechnic

Aug 2019 – May 2022

Diploma in Computer Science and Engineering

## Experience

### IBM Internship – Tejas Raksha (Yenepoya University)

*Cybersecurity Intern – Zero Day Scanner For Agricultural Portal*

- Developed an automated web vulnerability scanner for agriculture portals to identify OWASP Top 10 issues and support secure application review.
- Documented findings with remediation guidance and secure coding recommendations.

### IBM Academic Internship / Industry Collaboration (Yenepoya University)

*Cybersecurity Intern – DDoS Mitigation System Project*

- Built a DDoS mitigation system to detect suspicious traffic patterns and reduce distributed denial-of-service attacks.
- Worked on defensive security, monitoring, and digital forensics in an IBM-linked academic project.

### Deloitte Australia Cyber Job Simulation (Forage)

*Cyber Security Simulation*

- Completed cybersecurity tasks involving security monitoring, incident analysis, and risk assessment.
- Practiced SOC-style workflows including alert review, documentation, and response reporting.

## Skills

- **Security Operations & Cloud:** SIEM (Splunk Enterprise Security, SOAR), alert review, threat hunting, incident response basics, vulnerability assessment, DDoS mitigation, IDS/IPS concepts, SOC-style monitoring, AWS Security (IAM, Secrets Manager, Shield), secure cloud architecture.
- **Compliance, Forensics & Incident Response:** Documentation support, evidence tracking, process adherence, confidentiality, digital forensics, metadata extraction, heatmap analysis, forensic analysis, incident response.
- **Professional Skills & Productivity:** Written and verbal communication, client coordination, teamwork, organizational skills, time management, managing multiple tasks, Microsoft Excel, Google Sheets, trackers, documentation workflows.

## Tools & Technologies

Splunk (Enterprise Security, SOAR), Linux, Docker, Python, Java, C, JavaScript, SQL, HTML/CSS, Git, Excel, Google Sheets, Wireshark, Nmap, Burp Suite, Metasploit, Kali Linux, TryHackMe, Security Onion, ELK Stack, Jira

## Certifications

- **Platforms:** TryHackMe: 13 certifications, Top 1% globally
- **Security Operations & SIEM:** Splunk Training, Splunk Complete Course
- **Cloud & Network Security:** AWS Certified Security – Specialty, CompTIA Network+

- **Cybersecurity Foundations & Forensics:** Google Cybersecurity Specialization, Digital Forensics Essentials
- **Internships & Simulations:** Deloitte Australia Simulation, SAP Analytics Cloud Security

## Projects

- **Tejas Raksha:** Automated web vulnerability scanner for agriculture portals that detects OWASP Top 10 issues.
- **DefendX:** Real-time threat detection and monitoring system to simulate SOC operations.
- **AI-Powered Deepfake Detection System:** Deepfake detection tool using metadata extraction and heatmap analysis (99% accuracy).
- **Password Strength Checker:** Client-side tool that evaluates password entropy and weak patterns.
- **Kids Wonder Learn (KWL):** Educational platform with role-based access and security-focused configuration.
- **Doctors Appointment Booking System:** Workflow system with authentication and access control.

## Achievements

- Top 1% globally on TryHackMe (13 certifications)
- 2nd Place, IBM ICE DAY 2025 CTF Competition
- Finalist, CODE SPRINT National Hackathon (Top 7 of 65 teams)
- Winner, CIDECODE DeepFake Detection Hackathon
- Best Project Award, Doctors Appointment Booking System

## Activities

- Member, OWASP Yenepoya
- Active participant in CTFs, hackathons, and cybersecurity learning platforms
