

Giridhar Pai

Cybersecurity Analyst | SOC Analyst | Blue Team | Digital Forensics

Bantwal, Karnataka, India | +91 96201 36007 | www.giridharpai@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Professional Summary

Highly motivated cybersecurity student with hands-on experience in SOC-style monitoring, vulnerability assessment, digital forensics, cloud security, and secure system development. Built and contributed to academic, internship, freelance, and hackathon projects involving threat detection, authentication, encryption, access control, logging, and secure deployment. Strong interest in security operations, incident analysis, defensive security, and blue team workflows, supported by practical exposure to Splunk, TryHackMe, and security-focused project work.

Core Competencies

- Security monitoring, alert review, and incident analysis.
- Vulnerability assessment and secure application review.
- Digital forensics and metadata-based investigation.
- Documentation, reporting, evidence tracking, and process adherence.
- Communication, teamwork, client-facing professionalism, and coordination.
- Time management, structured follow-up, and task ownership.
- Strong attention to detail, confidentiality, and accountability.

Education

Yenepoya University, Mangalore

Jul 2023 – Jul 2026

BCA in Cyber Security, Ethical Hacking, and Digital Forensics (IBM Industry Collaboration)

CGPA: 9.15

- Specialized in cybersecurity fundamentals, ethical hacking, digital forensics, and practical defense-oriented workflows.

S N Moodbidri Polytechnic

Aug 2019 – May 2022

Diploma in Computer Science and Engineering

Certifications

- **Security Operations & SIEM**
 - [Splunk Training: 10 courses including Enterprise Security, SOAR, and Defense Analyst](#)
 - [Splunk: The Complete Course from Zero to Hero](#)
- **Cloud, Network, and Cybersecurity Foundations**
 - [AWS Certified Security – Specialty](#)
 - [CompTIA Network+](#)
 - [Google Cybersecurity Specialization](#)
 - [Digital Forensics Essentials \(EC-Council\)](#)
- **Practical Simulations and Platforms**
 - [Deloitte Australia Cyber Job Simulation \(Forage\)](#)
 - [SAP Analytics Cloud: Managing Security and Administration](#)
 - [TryHackMe – 13 certifications; Top 1% globally](#)

Technical Skills

- **Security Operations:** SIEM (Splunk), alert review, threat hunting, incident response basics, vulnerability assessment, DDoS mitigation, IDS/IPS concepts.
- **Compliance & Governance:** Documentation support, evidence tracking, process adherence, confidentiality, audit-oriented record keeping.
- **Cloud Security:** AWS Security, IAM, Secrets Manager, secure architecture.
- **Forensics:** Digital forensics, metadata extraction, heatmap analysis.
- **Productivity & Coordination:** Microsoft Excel, Google Sheets, trackers, documentation workflows, and reporting support.

Tools & Technologies

Splunk (Enterprise Security, SOAR), Linux, Docker, Python, Java, C, JavaScript, SQL, HTML/CSS, Git, Excel, Google Sheets, Wireshark, Nmap, Burp Suite, Kali Linux, TryHackMe, Security Onion, ELK Stack, Jira

Experience

IBM Internship – Tejas Raksha (Yenepoya University)

Mar 2026 – Apr 2026

Cybersecurity Intern – Zero Day Scanner for Agricultural Portal

- Developed an automated web vulnerability scanner for agriculture portals to identify OWASP Top 10 issues and support secure application review.
- Contributed to vulnerability detection workflows and secure testing practices relevant to real-world web application security.
- Documented findings clearly and accurately with remediation guidance and secure coding recommendations.
- Maintained structured technical notes and organized outputs to support follow-up, review, and reporting.

IBM Academic Internship / Industry Collaboration (Yenepoya University) 2025 – 2026

Cybersecurity Intern – DDoS Mitigation System Project

- Worked on an IBM-linked academic cybersecurity project focused on defensive security, monitoring, and digital forensics.
- Built a DDoS mitigation system to detect suspicious traffic patterns and reduce distributed denial-of-service attacks.
- Applied defensive security concepts in traffic analysis, project documentation, and workflow execution.
- Supported coordination and reporting while following defined academic and project deadlines.

Deloitte Australia Cyber Job Simulation (Forage) 2025

Cyber Security Simulation

- Completed enterprise cybersecurity tasks involving security monitoring, incident analysis, and risk assessment.
- Practiced SOC-style workflows including alert review, structured documentation, and response reporting.
- Strengthened communication, analytical thinking, and problem-solving through simulated client-facing work.

AgileTEC In-Plant Training Apr 2022

Trainee

- Completed a 3-week in-plant training program focused on Android app development and software engineering workflows.
- Gained practical exposure to development processes, project structure, and implementation discipline.

Selected Projects

Tejas Raksha 2026

Automated Web Application Security Scanner

- Developed a security scanner for agriculture portals to identify OWASP Top 10 vulnerabilities and support secure testing.
- Combined vulnerability assessment concepts with reporting-oriented output for practical review use.

DefendX 2025

Real-Time Threat Detection and Monitoring System

- Built a project designed to simulate SOC operations and support real-time threat detection and monitoring.
- Focused on defender-centric visibility, alerting concepts, and incident response support.

AI-Powered Deepfake Detection System 2025

- Developed a deepfake detection tool using metadata extraction and heatmap analysis for identifying manipulated media.
- Demonstrated applied digital forensics concepts in a project and hackathon setting.

Kids Wonder Learn (KWL) 2025 – 2026

Educational Platform with Security-Focused Configuration

- Contributed to an educational platform with role-based access, activity logging, and modular application structure.
- Incorporated security-oriented design thinking through access control, logging, and configuration planning.

Password Strength Checker 2024

- Built a client-side tool to evaluate password entropy and weak patterns and promote stronger password practices.

Doctors Appointment Booking System 2023

- Developed a workflow-driven healthcare appointment system with authentication, access control, and offline deployment concepts.

Achievements

- Ranked in the Top 1% globally on TryHackMe with 13 certifications.
- Secured 2nd Place in the IBM ICE DAY 2025 CTF Competition.
- Finalist in CODE SPRINT Hackathon (Top 7 of 65 teams).
- Won Consolation Prize in CIDECODE Hackathon.
- Received Best Project Award for the Doctors Appointment Booking System.

Activities and Community

- Member, OWASP Yenepoya.
- Active participant in CTFs, hackathons, cybersecurity learning platforms, and student security activities.
